

Your Training Plan

Version 1 • Created Oct 8, 2026, 10:38 AM

Plan Overview

Goal

Build maximum strength through foundational compound movements

Frequency

4 days per week

Split

Upper/Lower split

Version

1

Workout Notes

4-day upper/lower split designed for beginners. Focus on compound lifts with RPE-based intensity management and adequate rest for strength development.

Weekly Schedule

Day	Exercises
Monday	Barbell Bench Press (4x5-6), Bent-over Barbell Row (4x5-6), Barbell Overhead Press (3x5-6), Pull-ups (or Lat Pulldown) (3x6-8)
Tuesday	Back Squat (4x5-6), Romanian Deadlift (3x5-6), Leg Press (3x6-8), Standing Calf Raise (3x8-10)
Thursday	Incline Dumbbell Press (4x5-6), Chin-up (or Lat Pulldown) (3x6-8), Barbell Bicep Curl (3x8-10), Tricep Pushdown (or Dips) (3x8-10)
Friday	Front Squat (or Goblet Squat) (3x5-6), Trap Bar Deadlift (3x5-6), Bulgarian Split Squat (3x6-8), Lying Leg Curl (3x8-10)

Progression Strategy

Progress by increasing load on the bar when RPE 8 is achieved for all prescribed sets and reps, aiming to add 2.5–5 lbs per upper/lower session. Once 3 consecutive workouts at the same weight with RPE 8 are completed, advance the weight. Track weekly progress and incorporate deload weeks every 4–6 weeks to manage fatigue and ensure long-term strength gains.
